ABOUT US

EPP Composites is a leading global player in the rapidly growing Composite Industry. EPP was established in 1986 with the intention to develop its place in the Composite Industry with focus on Quality and Customer Service. It is a global multi-product, multi-divisional group, engaged into manufacturing of industrial & Lifestyle living Composite Products in India; an ISO 9001:2015 certified Company, spread over 650 thousand square feet with representation PAN India, Middle East, Asia Pacific, Europe & USA. We are a strong growing team of 1500 people & have >1000 satisfied customers to our portfolio.

We had a dream of making unparalleled quality of Composite products meeting International Standards including import substitutions and thus placing ourselves in the niche circle of globally renowned composite product manufacturing companies. Our goal remains to deliver highest quality at the most reasonable price meeting our customers expectations. The ever expanding list of our satisfied clients is indicative of our achievements.

EPP's involvement from design to commissioning in detailed project & engineering jobs has made it possible to develop our unique in-house designing expertise. EPP has a team of specialist designers & industry experts with a reputation to precisely design as per customers' applications.
