

EPP Composites Pvt. Ltd.

Secured Solutions With Anti Corrosive Strength

Pultruded FRP Products

Pultruded FRP Products

EPP Composites Pvt. Ltd. is an ISO 9001 certified company, and a leading manufacturer of Chemical resistant fiberglass products since more than two decades. EPP has a wide range of Pultruded FRP Products such as

- Gratings
- Staircase, Ladders, Hand Railings
- Pultruded Profiles in solid and hollow sections.

FRP Gratings

EPP offers **Molded** as well as **Pultruded FRP Gratings**.

EPP Molded Gratings are woven with Fiberglass cured in The matrix of unsaturated resins in one piece in a whole mould.

EPP Pultruded FRP Gratings are panels with open space, assembled through specially designed process with I or T shaped bearing bars and interlocked with solid grooved rods, and notch bar, which are all Pultruded. Resin system consists of Isophthalic / Vinylester with FR or Non FR properties.

EPP Pultruded Staircase, Hand railings, Ladders

EPP manufactured Staircase, Hand railings and ladders are with high strength, light weight are ideal for Industrial applications. Its Non conductive polymer construction offers increased protection in electrical areas.

EPP Follows OSHA standards for Ladders and Handrailings. **Resin system for the above consists of Isophthalic / Vinylester/ Epoxy with FR or Non FR properties.**

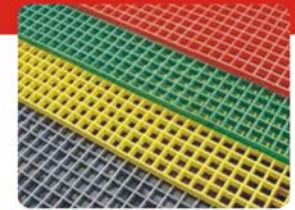

Phenolic Resin system is also available on request.

Salient Features & Advantages of Pultruded FRP Products

- Corrosion and weather Resistant
- Light Weight
- Low cost Installation
- Maintenance Free, Eco friendly and Durable
- Sturdy and Structurally Stable

Applications

- Chemical Process Industries
- Marine
- Oil & Gas, Off shore
- Pulp and Paper
- Cooling Towers
- Petro Chemical Plants
- Effluent Treatment Plants
